

# Mission 1 El Ray: Deductive Detective

Suggested Rank: **II** Lieutenant or above (Ages 8+)

*Four crimes connected to GK Delta and its Generation Kymera program were committed between the hours of 2344 and 0402, Pacific Time.*

An experimental Directional EMP Rifle Weapon was stolen from Kirtland AFB, New Mexico. The thief gained entry in and out of the facility by using a decommissioned truck from the GK Delta Base on San Nicolas Island.

An unknown assailant was able to elude White House security and kidnapped the President of the United States. The Oval Office was vandalized with the words "Down with GenKy!!"

A hacker breached the CIA database resulting in the compromise of thousands of classified intelligence reports related to the Generation Kymera program.

A second hacker was able to wirelessly take remote control of and steal an unmanned aerial drone. Network analysis shows this hacker could not be the same suspect as the CIA breach at 3:58AM. The hacker spoofed his IP Address to appear to come from the GK Delta Base.

*Because of the nature of the crimes, the Navy has only **4** Possible Suspects:*

**ALPHA**

**BOMBER**

**SHAM**

**SABOTAGE**

*El Ray was able to solve which suspect committed which crime using only these clues:*

**I** The suspects in the two hacking crimes used special military issued computer hardware, which would not be available to Alpha or Bomber.

**I I** Communications intercepted during the kidnapping of the president and the hacking of the CIA Database revealed that the suspects in those crimes did not have the letter E in their names.

**Tip:** Write down a list of all 4 suspects next to each crime and cross off suspects until you narrow it down to one suspect for each crime. Answers at [AlterNation.Toys](http://AlterNation.Toys)
